

Allergen Policy

As the majority of our food is packaging-free, nearly all allergens can be found in store. This may be the product itself or traces due to the manufacturing/transportation process.

We stock a variety of products that have various allergens and although we are careful to make sure each product does not come into contact with the other (by storing products in separate, airtight containers and using different scoops for allergen-containing foods) we cannot account for trace contamination as products are stored next to each other and all products are opened and decanted in the same environment.

When shopping with us please alert us to any allergens you are looking to avoid and we can advise. Unfortunately, if you suffer from life threatening allergies, we do not recommend shopping with Renewed Eco Shop.

A list of all allergens present in products or traces are available on request.
